

ATTORNEY-GENERAL NOT ABLE TO HELP THE TELEGRAPHERS

Statement Is Made for the Strikers That 23,000 Men, 80 Per Cent. of the Whole, Are Out With Large Numbers to Follow.

Startling developments in the telegraphers' strike situation were expected this afternoon following the arrival of Attorney-General Jackson in the city from Albany, but they failed to materialize. It was assumed by the strikers that the Attorney-General had come to New York in response to a request from a committee of three appointed to confer with him yesterday on the strike situation.

The Attorney-General went to his office at No. 299 Broadway, where he remained for about an hour. Then he left to attend to some other business, saying he would return to-morrow.

Deputy Attorney-General Dolson was seen at the office this afternoon. He said that up to that time the Attorney-General had received no communication of any nature from the strikers' committee. All he knew about the action of the strikers in bringing him into the matter was what he had read in the newspapers.

Only Three Grounds for Interference. "I have been looking the thing up," said Mr. Dolson, and said that there were only three conditions that might arise under which the Attorney-General would have authority to interfere with a corporation doing an interstate commerce business.

"Firstly—He might be ordered by the Legislature; secondly, he might be ordered by the Supreme Court; thirdly, he might take up an investigation if the corporation should become insolvent. I don't see what the Attorney-General can do. However, he will be glad to meet the committee here to-morrow if they want to come around."

A mass meeting of the strikers was held this afternoon at Everett Hall. Committees appointed yesterday to devise ways and means of raising funds reported and messages were read from various points telling of the progress of the strike.

One of the messages from Chicago said that between thirty and fifty operators employed there by the United States Steel Corporation had gone on strike. Others, the report stated, will go out to-night at Pittsburgh, Gary, Ind., and South Chicago and other places where the Steel Trust has offices.

Her Side of the Strikers' Side. The Executive Committee of the Commercial Telegraphers' Union of America issued this afternoon the following statement "for the benefit of the public, which has been somewhat misinterpreted by the officials of the two great telegraph companies":

"Conservatively estimated," says the statement, "there are between twenty-five and thirty thousand telegraphers of both sexes employed by the Postal and Western Union companies throughout the United States. This is actually estimated by both companies to be correctly estimated. With very few exceptions, in small offices throughout the country, every operator besides working his or her regular hours of eight or ten hours, works also from one to ten hours extra."

Only One "MOMO QUININE." That is LAXATIVE BROMO QUININE. Similar named remedies are everywhere. The original and only LAXATIVE BROMO QUININE is a WHITE PILL with black and red markings, and bears the signature of E. W. GROVE, D.C.

Help Wanted To-Day!

As advertised for in The Morning World's Want Directory.

ANNA WASSER

ELBERFELD BACK AT SHORT STOP FOR HIGHLANDERS

"Kid" Gets Into Game Again, Facing Detroit's Fierce Tigers.

BATTING ORDER.
Detroit. Elberfeld, 3b. Koussin, 2b. Cobb, 1b. Johnson, 1b. Downs, 2b. Ryan, c. Cleary, m. Killian, p. Umpire—Sheridan.

Present Clowry of the Western Union, went to see as to say that the fact that all news, apart from service is not to be used, with the exception of the Associated Press, or pushed through by special effort on the part of the Western Union or Postal.

"We have them looked to a finish," said Clowry. "It was the last time we saw him, and most of all, he was a very good man."

There was no organization. They have been looking for him for some time. The local organization is not in sympathy with the national officers. They are looking for him for some time.

While they were looking for him, they were going to do so, we were getting ready for them. When the men walked out, we had a complete story to take their places. The service is being every day. It will soon be normal.

THREE DEAD, TWO DYING, SCORES HURT IN CRASH.

(Continued from First Page.)

When the child's mother learned that he was dead she fell in a dead faint. Upon reviving she went into the room of hysterics. The boy was an only child and his parents worshipped him. His father, Dr. Curtis, was overwhelmed with grief at the fatal accident.

COCAINE GIVEN TO BOY TO DEADEN PAIN KILLS HIM

Little Son of William A. Whiting Dies at Home of Dr. Curtis.

Thomas Giavilla Whiting, the seven-year-old son of William A. Whiting, a wealthy resident of Burlington, Vt., died at the home of Dr. G. Lenox Curtis, No. 1 West Fifty-eighth street, to-day from cocaine poisoning. The cocaine was administered to the boy to ameliorate the pain while adenoids were being removed from his throat.

The Whiting are life long friends of Dr. Curtis, who stands in the front rank of the medical profession in this city. Several days ago they were invited to his home and were to leave to-day for their place in Vermont.

Tried to Relieve Boy. The physician had noticed that the boy had difficulty in breathing and had formed his parents that he was suffering from adenoids. He suggested that the little fellow would be greatly relieved if these obstructions were removed. He explained that it was a simple operation in which the mortality is about one in ten thousand.

As Dr. Curtis volunteered to remove the adenoids himself, the child's parents consented. He was laid on the operating table at 11 o'clock and the cocaine preparation shot into his throat in the method adopted by all practitioners.

The adenoids were cut away and the tonsils cleaned. The boy would need to be kept for a little while after the operation, but Dr. Curtis expected that he would pick up in time to leave town with his father and mother.

Immediately after the operation, however, the boy began to show signs of distress. He had been removed, but he was not able to breathe. Dr. Curtis was thoroughly frightened and telephoned to Dr. Thomas of No. 88 Madison avenue, a well-known specialist. He also sent for Dr. E. W. Lee, who was the surgeon who attended President McKinley on his death-bed.

Physicians Hurried to His Side. They hurried to the house in their automobiles and immediately went to work on the boy. He died while they were endeavoring to stay the ravages of the poison. It was necessary to find the death to the coroner's office, and Dr. Albert T. Weston went to the house. He set down the cause of death as cocaine poisoning.

When the child's mother learned that he was dead she fell in a dead faint. Upon reviving she went into the room of hysterics. The boy was an only child and his parents worshipped him. His father, Dr. Curtis, was overwhelmed with grief at the fatal accident.

TUBERCULOSIS NO LONGER A FATAL DISEASE.

If any one tells you that tuberculosis is incurable, don't believe it, because the Dr. Anderson X-Light proves it can be cured.

The Dr. Anderson X-Light corrects mistakes. It is the first and only means known to the medical profession by which an absolutely correct examination and diagnosis of the lungs may be instantly obtained.

Any disease at any stage may be detected and located instantly and a positive diagnosis obtained from three to six months sooner than is possible by the usual medical examinations.

It is used by Dr. Anderson the inventor, in New York only, at 50 West 22d street.

One of the many hundreds of Dr. Anderson's cured patients says (name given, if desired for reference):

"I had consumption; at my residence I knew it and several doctors said it was incurable. A professor of Cornell University, who had been cured by the Dr. Anderson X-Light, in order to find out how it was cured, they cured me. But after being examined by this light, I knew that at last my disease had been cured. I am now a healthy man and have been so for several years."

Consultation and examination given free by Dr. Anderson at his office, 50 West 22d street, New York, between 5th and 6th avenues. Hours—Daily, 10 to 4; Monday, Wednesday, Friday evenings, 8 to 10 o'clock; Sunday, 1 to 4. If unable to call, write for particulars.
